

Sample answers of common questions asked in visa interview (course chemistry)

why USA?

As my course is bachelor in chemistry which need practical approaches with good laboratories infrastructure as per demand of age, situations and markets of today's world. Well globally exposed degree with the quality education and flexibility in the filed of research of chemical will surely enhance my learning experience and help me to uplift the level of standards in education. Similarly , studying over there will grant me unlimited opportunities here in nepal so i think us is boom country for me.

Why this course?

Well officer since my high school I always want to know the mechanism of chemistry how chemicals interact with human biological as drugs and medicine to reduce

disease and viruses. And studying this will help me to understand about the pharmacology and pharmacodynamics that is known as detection of chemical which will surely enhance my experience in further days. Moreover, i have a dream of being medical person without involving in biological fields so to grab that point i need to pursue my degree in chemistry.

why this University?

Officer I really impressed by the university's exceptional program uniquely addressing the detection of drugs how they interact with human biology molecules where professor dr. XYZ is currently engaged for research of it that is anti cancer society perfectly aligns with my career goals. On the top of that I will get opportunity to collaborate with American chemicals society which will really help me to communicate with different languages of chemistry with cutting-edge technology in

my upcoming days. And I really attracted by the system of interdisciplinary and global trend of facilities like electron microscopy lab and X-ray diffraction lab in the university.

What is your plans after your graduation?

upon graduation, As a chemist,i have two plans for short, I will join the part of government ministry of health specially in national medicine laboratory of Nepal to explore my creativity knowledge and experience that i will gain in the entire days of my studyThat will make me able to work under the pressure of chemicals and help me to detect and analyze the pre and post marketing of drugs as a medicines. on the top as long i will co-ordinate with different geologist of nepal to promote how medicinal herbs are used in international and national of business to make medicine.

what changes have you made this time?

Officer since my last refusal I changed my university where I will gain capstone course of pharmacology and pharmacodynamics that is known as the detection of chemical how they interact with human body. (If there is decreasing number of coa) then you can talk about cost of attendance if not then you can mention the percentage of your scholarship. Well to be honest last time i was totally messed up with my financial part but this time i had also add our (property....) as a source of income. So these are my changes.

Why you change your university?

In comparison, my previous university's primary focus was on detection of polymer but my emphasis will be on pharmaceuticals sector. And in this

University the professor XUYZ is currently engaged for the research of pharmaceutical research like anti cancer society. So i think this university will me help to understand find out my real career path. So i think it will be fruitful for me.

Who is your sponsor ?

I'm going to fund form my parents. My dad is sales manager in well reputable companies of Kuwait name as Kuwait technologies since 2014. And he earns around 25k\$ in year . And my mom is Assistant nurse in (zzzzzzzz) since 2013. And she earns around 6k \$ in a year. So altogether my parents earn 31k\$ annually. Apart from this we have 2 public vehicles in pokhara from there we generate 12k in year. So these are the income sources of my family from where i will be funding.
